**Light, Gesture, and Color** Feb 04 2021 Jay Maisel, hailed as one of the most brilliant, gifted photographers of all time, is much more than that. He is a mentor, teacher, and trailblazer to many photographers, and a hero to those who feel Jay's teaching has changed the way they see and create their own photography. He is a living legend whose work is studied around the world, and whose teaching style and presentation garner standing ovations and critical acclaim every time he takes the stage. Now, for the first time ever, Jay puts his amazing insights and learning moments from a lifetime behind the lens into a book that communicates the three most important aspects of street photography: light, gesture, and color. Each page unveils something new and challenges you to rethink everything you know about the bigger picture of photography. This isn't a book about f-stops or ISOs. It's about seeing. It's about being surrounded by the ordinary and learning how to find the extraordinary. It's about training your mind, and your eyes, to see and capture the world in a way that delights, engages, and captivates your viewers, and there is nobody that communicates this, visually or through the written word, like Jay Maisel. *Light, Gesture & Color* is the seminal work of one of the true photographic geniuses of our time, and it can be your key to opening another level of understanding, appreciation, wonder, and creativity as you learn to express yourself, and your view of the world, through your camera. If you're ready to break through the barriers that have held your photography back and that have kept you from making the types of images you've always dreamed of, and you're ready to learn what photography is really about, you're holding the key in your hands at this very moment.

Fighting Parkinson's... and Winning Dec 02 2020 "After reading this book and following Howard's recipe for some time now, I can only say this book is worth each and every word. It is highly valuable and, by the way, I feel much better now and my symptoms have almost disappear so far. I recommend to anyone who is seeking some alternative path to his treatment on Parkinson's." - Amazon Kunde, Amazon Verified Purchaser. "Howard's Recipe For Recovery is a breath of fresh air; If you do the recipe you will be on the road to recovery, the same road the cured walked before us, six of them so far in the past seven years. How full of hope is that?! The first sign that things were turning around for me was that my sense of smell came back after twenty years. Now where before there was despair I'm so thankful to have hope and the means to make it happen...now there are tears of joy! It's a great book...Don't miss it! Hope fulfilled is priceless and it's in your hand. Buy the book!!!!" - Thomas J., Amazon Verified Purchaser. "This book is the fascinating story of his recovery, and the recovery of others over the years afterwards, using his Recipe...Although there are a few individual, poorly substantiated claims of curing Parkinson's, this is the only one I know of that has cured multiple identified individuals of this "incurable" disease. We owe Howard a great deal of gratitude for his generosity in sharing his Recipe with us here and on his extensive website. His Recipe is likely to be the best cure available over the next decade." - prestonpdx, Amazon Verified Purchaser. Howard Shifke fully recovered from Parkinson's Disease. This memoir presents Howard's story of getting Parkinson's and provides a detailed account of how he won the fight against it. The memoir tells the story of what it was like for Howard to live day-to-day with Parkinson's, getting through the daily challenges and misgivings as well as how he looked toward the future with hope. Howard suffered with internal tremors; extremely poor balance; Bradykinesia (walking -- hunched forward, shuffled feet, arms did not swing); rigidity (arms, legs and upper back were tight and extremely painful); constipation; inability to stand up straight, to get out of a chair without using arms, to go up and down stairs without holding railing; difficulty getting a utensil to his mouth when trying to eat; falling asleep in middle of the day; frozen face; inability to write or to type with two hands; extreme fatigue. In the fall of 2009, Howard Shifke was diagnosed with Parkinson's Disease. His mother had Parkinson's for twenty-four years before dying in 2007, just two years prior to Howard diagnosis of Parkinson's. Having watched her physically deteriorate from the disease and mentally deteriorate from the medications was difficult and frightening. Howard did not want to end up the way his mother had ended up with the disease. Fortunately, in 1999, Howard had started studying alternative

healing and Traditional Chinese Medicine. In the ten years leading up to his diagnosis, he had learned the body has the ability to heal itself. As a result, Howard decided he would endeavor to recover from Parkinson's, and he developed an alternative treatment methodology called his Parkinson's Recipe for Recovery(R). Nine months later, he won the fight against Parkinson's with his full recovery. In Howard's two neurologist visits subsequent to his full recovery, his neurologist put him through all of the tests used for the original diagnosis. Both times, his neurologist documented in Howard's medical records that there were no signs or symptoms of Parkinson's Disease. Howard has been symptom free fully recovered from Parkinson's since June 12, 2010.

**Guns, Germs, and Steel: The Fates of Human Societies** Jun 20 2022 "Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

In *Attract Mode: The Rise and Fall of Coin-Op Arcade Games*, author Jamie Lendino celebrates both the biggest blockbusters (Pac-Man, Star Wars: The Arcade Game) and the forgotten gems (Phoenix, Star Castle) of the Golden Age of coin-op gaming, and pulls back the curtain on the personalities and the groundbreaking technologies that brought them to glitzy, color-drenched life in the U.S., Japan, and all over the world. You'll start your journey exploring the electromechanical attractions and pinball games of the early 20th century. Next, you'll meet the earliest innovators, who used college computers and untested electronics to outline the possibilities of the emerging form, and discover the surprising history behind the towering megahits from Nintendo, Sega, and others that still inform gaming today. Then you'll witness the devastating crash that almost ended it all—and the rebirth no one expected. Whether you prefer the white-knuckle gameplay of Robotron: 2084, the barrel-jumping whimsy of Donkey Kong, or the stunning graphics and animation of Dragon's Lair, *Attract Mode* will transport you back to the heyday of arcade games and let you relive—or experience for the first time—the unique magic that transformed entertainment forever.
