The primary focus of this study is to view Eliade as not only a historian of religions but also as a theologian, a philosopher, novelist and as someone engaged in cross-cultural dialogue with other religious traditions. Besides attempting to view Eliade's work from a variety of perspectives, this study contends that the scholarly work of Eliade cannot be separated from his own personal quest for meaning. Science fiction and fantasy is one of the most challenging--and rewarding!--genres in the bookstore. But with New York Times bestselling author Philip Athans and fantasy giant R. A. Salvatore at your side, you'll create worlds that draw your readers in--and keep them reading! Just as important, you'll learn how to prepare your work for today's market. Drawing on his years of experience as one of the most acclaimed professionals in publishing, Wizards of the Coast editor Athans explains how to set your novel apart--and break into this

lucrative field. From devising clever plots and building complex characters to inventing original technologies and crafting alien civilizations, Athans gives you the techniques you need to write strong, saleable narratives. Plus! Athans applies all of these critical lessons together in an unprecedented deconstruction of a never-before-published tale by the one and only R. A. Salvatore! There are books on writing science fiction and fantasy, and then there's this book--the only one you need to create strange, wonderful worlds for your own universe of readers! "This heartfelt, witty addition to women's fiction will appeal to fans of Elizabeth Berg and Anna Quindlen." (Booklist)

Georgia Waltz has things many people only dream of: a plush Manhattan apartment overlooking Central Park, a Hamptons beach house, valuable jewels and art, two bright daughters, and a husband she adores, even after decades of marriage. It's only when Ben suddenly drops dead from a massive coronary while training for the New York City Marathon that Georgia discovers her husband—a successful lawyer—has left them nearly penniless. Their wonderland was built on lies. As the family attorney scours emptied bank accounts, Georgia must not only look for a way to support her family, she needs to face the revelation that Ben was not the perfect husband he appeared to be, just as her daughters—now ensconced back at home with secrets of their own—have to accept that they may not be returning to their lives in Paris and at Stanford subsidized by the Bank of Mom and Dad. As she uncovers hidden resilience, Georgia's sudden midlife shift forces her to consider who she is and what she truly values. That Georgia may also find new love in the land of Spanx and stretch marks surprises everyone—most of all, her. Sally Koslow's fourth novel is deftly told through the alternating viewpoints of her remarkable female protagonists as they plumb for the grit required to reinvent their lives. Inspiring, funny, and deeply satisfying, *The Widow Waltz* explores in a profound way the bonds between mothers and daughters, belligerent siblings, skittish lovers, and bitter rivals as they discover the power of forgiveness, and healing, all while asking, "What is family, really?"

To Mr. Tate Howard, You are quite possibly the most infuriating, annoying and grumpy man I've ever met in my life. I know you think that you're God's gift to women, but I have a secret to let you in on: you're not. You're God's gift to yourself. Get over your wanna-be cool surfer self and grow up. I thought it was time that someone addressed your big head and told you straight to your face that you're not all that. Just because you have an Ivy league education doesn't mean you're the smartest man in the world. In fact, I'm not even sure if you would have gotten in if you didn't have rich parents. Yes, I went there. Every woman doesn't want to sleep with you and I'm sure you're not even good in bed. And I'm someone that would know. From, Your Secret Not Admirer It's a summer internship. Never mind that the owners are hot. Never mind that there are three of them. Never mind that they are twice her age. Never mind that they have a secret "play" room in the basement. Never mind that she's never been more intrigued in her life. She only has three months. No matter how deeply she gets involved, she can't stay... The war is over and blackouts are a thing of the past, except in the village of Melchester, where the local council has refused to sully its streets with unsightly lamps. The night is pitch black, but hardly quiet. Young lovers are rendezvousing, a police constable is helping himself to a few of his neighbor's partridges, and a poet is going to visit his beloved, a new verse on his lips. She will never hear it, sadly, for the young man is stopped along his way - stopped forever, by the tight grip of the garrote. The local constabulary wastes no time reaching out to Scotland Yard, which sends its best man: the easygoing detective-

inspector Littlejohn. In Melchester he will find unspeakable secrets - and one citizen whose soul is as dark as the village night. Love can be blinding and by the time the truth shines through, it's too late to escape. Fame. Fortune. Success. Is that too much to ask? All I need is to catch a break. To snag the attention of someone important. Someone who can help make my career everything I want it to be. Joseph was that man. Until the night the lights went out and I left with someone else. Someone who stole my breath and made me want for things I'd never considered before. I should have known better than to trust a stranger. Especially one of his stature and class. Money means power and power means control. Over my heart. My career. My entire life. My dreams died the moment I agreed to his terms and a new chapter in my life began. I was blinded by my love for him and thought nothing would ever change the way I felt. Then I uncovered the truth about him. About the kind of man he really was and the secrets he paid good money to keep hidden from everyone. Now I'm trapped, with no way out. Book 1 of 2 in the Storm Series. It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the

boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life. A Discovery of Witches meets Twilight in this mesmerizing paranormal romance... Naomi Feldman has never understood the strange energy that hums beneath her senses. But when she comes across an ancient artifact that seems to beckon to her, she may finally find the answers she's been seeking. Alaric, a centuries-old vampire, lives a solitary life by choice. When he's assigned to protect Naomi, long dormant emotions stir to life. Pursued by a dangerous enemy and battling their growing attraction, Naomi and Alaric follow the mystery of the artifact from the museums of Athens, the streets of London, toward a confrontation that will decide the fate of two worlds... Fans of Charlaine Harris, Deborah Harkness, and Karen Marie Moning will love the Descendants series, where urban fantasy and paranormal romance collide. Not many have the courage for what needs to be done to maintain power . . .but I do. And I always get what I want. Including my son's fiancée. She's mine now, and I'll use Francesca any way I see fit. She's the perfect match to my twisted desires, and I'll keep her close, ready and waiting at my disposal. Even if she fights me at every turn. **FRANCESCA** I was stolen away and held prisoner in Italy, a bride for a mafia king's only heir. Except I'm no innocent, and it's the king himself-the man called *il Diavolo*-who appeals to me in sinful ways I never dreamed. Fausto's wickedness draws me in, his power like a drug. And when the devil decides he wants me, I'm helpless to resist him-even if it means giving myself to him, body and soul. He may think he can control me, but this king is about to find out who's really the boss. ***** **MAFIA MISTRESS** is a full-length mafia romance written by a USA Today Bestselling author. It's the first book in the Italian Kings duet, not a standalone. Explores the range of diagnoses found on inpatient psychiatric units providing practical advice in an accessible format for managing patients.

Our society is struggling with what Pope Benedict has called "profound crisis of faith that has affected many people." In response, the Holy Father has called us all to a Year of Faith from October 2012 to November 2013. We see the signs all around us: the demand for science to prove everything before we can believe it, the role of media and celebrities who deny the existence of God and denounce the role of the Church, and the ease in which we can all isolate God and faith into only one part of our life. In a follow-up to his best selling St. Paul Bible Study for Catholics during the year of St. Paul, Fr. Mitch Pacwa once again leads Catholics to a deeper understanding of Pope Benedict's call to action for the year. Perfect for individual or group study, this book is a wonderful guide to experiencing a conversion, growing in faith, and following Jesus Christ more closely. It shows us how to integrate every component of our life - relationships, morality, work, recreation, and all - into a meaningful whole. Make the most of Pope Benedict's Year of Faith, walking hand in hand with Fr. Pacwa as he guides you through the beauty and insights of Scripture in relationship to your everyday life. Provides an introduction to magnetism and the creation, forces, and applications of magnets. Combining the most inspiring of three best-selling books, this 365-day guide to prayer and miracles feeds you daily manna from Heaven. Your spirit will be enlightened and your soul strengthened as you face each day's glories and glooms. You are the God who performs miracles; You display your power among the peoples (Psalm 77:14). The best from The Supernatural Power of a Transformed Mind, Dreaming With God, and When Heaven Invades Earth gives you the power to daily walk out of religious boundaries toward your Christian inheritance of healing, signs and wonders, and infinite possibilities. You can experience A Life of Miracles one beautiful day at a time! Visual QuickStart Guide –the quick and easy way to learn! A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques

This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data

mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. With its comprehensive collection of advanced data mining methods coupled with tutorials for applications in a range of fields, Making Sense of Data II is an indispensable book for courses on data analysis and data mining at the upper-undergraduate and graduate levels. It also serves as a valuable reference for researchers and professionals who are interested in learning how to accomplish effective decision making from data and understanding if data analysis and data mining methods could help their organization. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.

AUDIENCE: Appropriate for anyone interested in learning programming with Visual Basic 2008. Create action-packed 3D games with the Microsoft XNA Framework. This book explores numerical implementation of Finite Element Analysis using MATLAB. Stressing interactive use of MATLAB, it provides examples and exercises from mechanical, civil and aerospace engineering as well as materials science. The text includes a short MATLAB tutorial. An extensive

solutions manual offers detailed solutions to all problems in the book for classroom use. The second edition includes a new brick (solid) element with eight nodes and a one-dimensional fluid flow element. Also added is a review of applications of finite elements in fluid flow, heat transfer, structural dynamics and electro-magnetics. The accompanying CD-ROM presents more than fifty MATLAB functions. A step-by-step guide to drawing your favorite Nintendo heroes and villains. She's running for her life. He's the safe haven she never expected to find. The holiday season is about to get HOT. Hiding out for the holiday season in the heart of the South? Not something that Haley Quick ever expected to have on her to-do list but then...she never expected her ex to want her dead, either. Turns out, life is full of surprises. Time to deal. Haley has ditched New York for a crazy little dot on the map known as Point Hope, Alabama. It's a town gone extra crazy for the holidays, and Haley is sticking out like a sore thumb with her very much Grinch-self. But enter sexy sheriff Spencer Lane...Tall, muscled, and made with an extra dose of sex appeal, he is exactly the kind of man that Haley should be avoiding. He's charming, he looks way too good in a Santa hat, and, oh, yes, he's her new landlord. The hits just keep coming. She can't afford to let Spencer learn all of her secrets, a tough job since she is living with the man. No sex, though. It's purely a business relationship. Except...the holidays in the South sure do get HOT. Or maybe that's just sexy Spencer. Usually, Haley falls for the bad guy. It's the whole reason she's running for her life. She can't help but wonder...What would it be like to fall for a man like Spencer? He just got his Christmas wish. Sheriff Spencer Lane can't believe his luck. The most beautiful, fascinating woman he's ever seen has just dropped into his life like a gift from, well, the big guy in red. Only the problem is that Haley seems to think Spencer is some by-the-book, nice guy. Probably because of the badge. And if she wants him to be the hero, that's a role that he's happy to play for her. But the truth is, Spencer has plenty of darkness inside, too. An ex Navy SEAL, he knows how to get sh—um, stuff done. He also knows how to be very, very naughty. When danger threatens his Haley, all bets are off. No one is going to hurt her. No one is going to threaten her. Not in his town. Not on his watch. The nice guy will show Haley just how bad he can be. Fake snow, a parade of wild elves, and a stalker ex don't make for the merriest of times, but in Point Hope, anything can happen—and it usually does. Ready for a steamy story that will get you in the ho-ho-

ho spirit? Settle back, curl up with Spencer, and have yourself a jolly old time. From G.I. As in the days following Skylab, solar physics came to the end of an era when the Solar Maximum Mission re-entered the earth's atmosphere in December 1989. The 1980s had been a pioneering decade not only in space- and ground-based studies of the solar atmosphere (Solar Maximum Mission, Hinotori, VLA, Big Bear, Nancay, etc.) but also in solar-terrestrial relations (ISEE, AMPTE), and solar interior neutrino and helioseismology studies. The pace of development in related areas of theory (nuclear, atomic, MHD, beam-plasma) has been equally impressive. All of these raised tantalizing further questions about the structure and dynamics of the Sun as the prototypical and best observed star. This Advanced Study Institute was timed at a pivotal point between that decade and the realisation of Yohkoh, Ulysses, SOHO, GRANAT, Coronas, and new ground-based optical facilities such as LEST and GONG, so as to teach and inspire the up and coming young solar researchers of the 1990s. The topics, lecturers, and students were all chosen with this goal in mind, and the result seems to have been highly successful by all reports. More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being

discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today. Miss Julia faces a double dose of trouble-this time right under her own roof. Miss Julia's iron will and kind heart have assured her a spot among the most beloved characters of Southern literature. In her latest adventure, Miss Julia whisks Hazel Marie off to the doctor when the latter admits she's been feeling poorly. The news floors them both: Hazel Marie is pregnant with twins. Unfortunately, she's also just sent her beau, Mr. Pickens, packing. Miss Julia needs a plan-and fast. So when Sam's house is robbed, Miss Julia declares that only J. D. Pickins, P.I., can get his things back. Playing Cupid and solving the crime might seem like a tall order but readers everywhere know that Miss Julia always delivers the goods. Eliza Knight's bestselling Scottish historical romance series, *The Stolen Bride Series*, is back with another amazing tale of adventure, passion and love! Ceanra Montgomery had notions of marrying for love after her first disastrous marriage ended in widowhood. But now Robert the Bruce has ordered her to marry a stranger, securing a strong alliance and ending a decades-old feud. Already used as a pawn once in marriage, she is devastated that she will once more have to give up her happiness in order to please the edicts of men. And while the braw warrior standing before her might incite feelings inside her she thought long since buried, desire is a far cry from love. The rivalry between Brochan Lamont and his twin brother, John, began in the womb, and only grew worse from there. They were pitted against each other in childhood, and their father left them with a legacy that was a race to the finish-whoever has an heir first inherits the lands. The only problem is that Brochan has given his loyalty to the Scots, and his brother to the English. In order to keep the lands and ships under Scottish control, Robert the Bruce demands Brochan marry to break the iron-clad will. His new bride harbors a fiery temperament that lures Brochan into stoking her passions instead of her ire. Aligned to strengthen the Scottish claims on the realm, Brochan and Ceanra must work together to overcome the obstacles that bind them. But perhaps seeing their duties through does not have to be as painful as they both predicted. Is it possible that love can be forged from a union born in alliance? Maybe Fate knew all along just who was meant for who... *How to Lose a Guy in Ten Days* meets *Accidentally on Purpose* by Jill Shalvis in this head-over-

heels romantic comedy. Written by a practicing business attorney with startup experience in the environmental and technology sectors, this comprehensive handbook assists entrepreneurs in tackling the wide variety of opportunities to go green. A one-stop resource for entrepreneurs, it helps readers incorporate clean technology, environmental practices, and green business approaches into the work environment. The book discusses how to sell to utilities, explores fundraising outlets for green businesses, covers government incentives, presents key startup tools aimed at green businesses, and addresses challenges of many new businesses, such as raising money and making sales. Additional resources are available on the book's website. The precise shape of a protein is a crucial factor in its function. How do proteins become folded into the right conformation? Molecular chaperones and protein folding catalysts bind to developing polypeptides in the cytoplasm and ensure correct folding and transport. This Guidebook catalogues the latest information on nearly 200 of these molecules, including the important class of heat shock proteins; each entry is written by leading researchers in the field.
