Catching a Serial Killer Mar 27 2020 The true story behind the ITV series, *A Confession* 'The gripping allure of long-form podcasts, such as *Serial*' *Observer* On the evening of Saturday, 19 March 2011, D.S. Stephen Fulcher receives a life-changing call that thrusts him into a race against the clock to save missing 22-year-old Sian O'Callaghan, who was last seen at a nightclub in Swindon. Steve knows from experience that he has a small window of time to find Sian alive, but his hopes are quickly dashed when his investigation leads him to Christopher Halliwell, a cabbie with sick

obsessions. Following the investigation as it develops hour-by-hour, Steve's gripping inside story of the cat-and-mouse situation that ensues shows how he hunted down Halliwell - his number-one suspect - which led him to the discovery of Sian's body and another victim, Becky Godden-Edwards, who had been missing since 2002. The murders shocked the nation and Halliwell become one of the most hated men in Britain. Since then, he has been linked to several murders and disappearances, and has been called 'sick in the head' by an ex-cellmate for his unrelenting hatred of women. Catching a Serial Killer is a thrilling, devastating and absorbing look at a real-life murder case and potentially one of the UK's most prolific serial killers.

A Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Oct 14 2021 The report discusses how economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries. The analysis indicate that: the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars; company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies, and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives; CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars; targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases; transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars.

In Deep Water Nov 22 2019 Irish Water was set up in 2013 to introduce the most ambitious water metering programme in the world. The plan was to get Irish people to finally pay to upgrade a nineteenth-century water system. The water metering programme began in August 2013 and was carried out at breakneck speed. However, it did not go to plan and the issue of water charges divided Ireland. There were nationwide demonstrations, and confrontations in housing estates involving water meter contractors, gardaí and water charge protesters. The programme ended in political disaster, with a humiliated government having to send out one million refunds. With access to unpublished documents, and interviews with the key personalities on both sides, *In Deep Water* provides a blow-by-blow account of how it all went wrong. The rows at cabinet. The warnings that went unheeded. The water women. The smartphone-wielding protesters. And the minister who threatened to reduce people's water to a trickle. Compulsively readable and fast paced, *In Deep Water* gives an inside view of the controversy that divided Ireland.

Research Methodology on Data Envelopment Analysis (DEA) Dec 16 2021 Data Envelopment Analysis (DEA) represents a milestone in the progression of a continuously advancing methodology for data analysis, which finds extensive use in industry, society and even in education. This book is a handy encyclopedia for researchers, students and practitioners looking for the latest and most comprehensive references in DEA. J.K. Mantri has specifically selected 22 research papers where DEA is applied in different fields so that the techniques discussed in this book can be used for various applications. In A Bibliography of Data Envelopment Analysis (1978-2001), Gabriel Tavares states that DEA is a mathematical programme for measuring performance efficiency of organizations popularly named as decision-making units (DMU). The DMU can be of any kind such as manufacturing units, a number of schools, banks, hospitals, police stations, firms, etc. DEA measures the performance efficiency of these kinds of DMUs, which share a common characteristic: they have a non-profit organization where measurement is difficult. DEA assumes the performance of the DMU using the concepts of efficiency and productivity, which are measured as the ratio of total outputs to total inputs. The efficiencies estimated are relative to the best performing DMU, which is given a score of 100%. The performance of other DMUs varies between 0% and 100%.

Ferdie Extraordinary Man Jul 31 2020 Ferdie was carved from history and he made history, he came from Goan stock. He was fearlessness wrapped in empathy and intelligence and navigated shifting apartheid, class, customs and rules. He was born in Jinja, Uganda, went to school in Goa, returned to Uganda not knowing what his future will be. He did 21 years' service with the British and Uganda Government as a Civil Servant, ending up as the Under Secretary in the President's Office (President Obote and President Idi Amin). The wellbeing of the Goan Association (UK) was important to him and he helped to produce a revised Constitution & Rules which was approved by the general body in 1988. This 'memoir' records his social, work and personal spheres and shows this man was extraordinary.

Sound and Safe Apr 27 2020 Do you enjoy listening to music while driving? Do you find radio traffic information indispensable? Do you appreciate the moments of your drive in which you can listen to or sing along with whatever you like? This book shows how we created auditory privacy in cars, making them feel sound and safe, even though automobiles were highly noisy things at the beginning of the twentieth century. It explains how engineers in the automotive industry found pride in making car engines quieter once they realized that noise stood for inefficiency. It follows them as they struggle against sounds audible within the car after the automobile had become a closed vehicle. It tells how noise-induced fatigue became an issue once the car became a mass means for touring across the country. It unravels the initial societal concerns about the dangers of car radio and what it did to drivers' attention span. It explores how car drivers listened to their cars' engines to diagnose car problems, and appreciated radio

traffic information for avoiding traffic jams. And it suggests that their disdain for the ever-expanding number of roadside noise barriers made them long for new forms of in-car audio entertainment. This book also allows you to peep behind the scenes of international standardization committees and automotive test benches. What did and does the automotive industry do to secure the sounds characteristic for their makes? Drawing on archives, interviews, beautiful automotive ads, and literature from the fields of cultural history, science and technology studies, sound and sensory studies, this book unveils the history of an everyday phenomenon. It is about the sounds of car engines, tires, wipers, blinkers, warning signals, in-car audio systems and, ultimately, about how we became used to listen while driving.

The Oxford Handbook of Music and Advertising Aug 12 2021 "The Oxford Handbook of Music and Advertising assembles an array of forty-two pathbreaking chapters on the production, texts, and reception of advertising through music. Uniquely interdisciplinary, the collection's tripartite structure leads the reader through these stages in the communication of the advertising message as presented by Chris Wharton (2015). The chapters on production study the factors, activities, and people behind the music for the marketing pitch, both past and present. Prominent throughlines in the section include factors influencing the selection of music (and musicians) for advertising, the role of music in corporate branding strategies, the creative forces behind the soundscape of advertising, and industry practices that undergird all aspects of music in commercial contexts. The section on Text focuses on analytic and historical approaches to ads in various media, and includes commentaries on musical genres in ads ranging from Western European art music to American popular genre. Also covered in this section is ad music as used in different ad genres, such as political ads, public service announcements, and television commercials. The analyses used in this section draws from traditional music theory, semiotics, and hermeneutic analysis. Finally, the last section addressing "Reception"-with contributions by researchers in psychology, marketing, and other fields-involves the formulation of models and theories, and implementation of research methods to examine how the presence of music may influence peoples' attitudes, emotions, thoughts, and behaviors in the context of advertisements and within service environments such as stores, restaurants, and banks. The editors and chapter contributors of this book bring a diversity of perspectives to the topic but share a united aim: to illuminate music's vital contribution to the advertising message"--

Auto Brand Dec 04 2020 The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive

industry from a leading industry expert and features: • Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo • The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-stranding repair shops and professional organizations • The results of a new international study on car buyer behaviour based on 4,700 survey answers Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.

Stapleton's Real Estate Management Practice Apr 20 2022 Previously known as Estate Management Practice, the fourth edition of this work has been renamed to reflect current market practice and to embrace the discipline of corporate real estate. This book provides a comprehensive study of the management of urban property and is divided into three parts. Part one considers the diverse nature of the many types of estates and different

aspects and interpretations of the management task. Part two concentrates on the management of leased property, repairs, service charges and rent reviews and the statutory framework within which the landlord and tenant relationship has developed. Part three is concerned with the positive management covering both technical skills, such as portfolio performance, and the professional practice environment in which they are exercised. Stapleton's Real Estate Management Practice is written both for advanced students and practitioners. It provides a firm basis for management affecting the decision-making hierarchy from tenant to property, to portfolio, to proprietary unit. While retaining the format of previous editions, it has been updated to reflect the many changes in the law, practice, technology and the market place since the previous edition. In addition, this new edition highlights factors that influence the enhancement of different types of property and the various strategies involved in managing properties from both owners' and occupiers' point of view.
