Most of these books are what we call miscellanies, compilations of the works of multiple folklorists, and they feature articles on many types of lore. We've also published over

twenty "Extra Books," which are single-author manuscripts that examine a more focused topic. Short Call: Snippets from the Smallest Places in Texas, 1935-2000 by Joyce Gibson Roach, is TFS Extra Book #24. Joyce Gibson Roach has collected "snippets" of stories, recipes, and traditions of life in Turtle, Texas, which represents many small towns--and the people who inhabit them. Many of the younger generations leave such towns, finding both place and society crumbling. Those who've stayed are finding new and interesting ways to put themselves and their places back together. Both the short and long pieces herein are about the folks who've elected to stay generation after generation, knowing that for them wherever they've stayed is still the Home Place. The characters' viewpoints are personal, sometimes agreeing with facts found in history books and sometimes not. A smart way to teach children to think logically and creatively One of the most precious gifts you can offer a child is a sharp mind. The 56 puzzles in this delightful collection were passed down through generations of Chinese families who wanted their children to develop concentration and mental agility. Baifang spent hours enjoying them with her family and friends as she was growing up in the north of China. Now living in San Francisco, Baifang is passing them on to her own children and to families everywhere. Each puzzle inspires clear, precise, and inventive thinking. Some teach math concepts; others involve spatial relationships and visualization. All of them have fascinating solutions and help improve memory and problem-solving skills. An inexhaustible source of challenging fun, these are mental calisthenics for stimulating interaction between lively minds from ages 8 to 80.
