An unprecedented look into the basic physics, chemistry, and technology behind the LCD Most notably used for computer screens, televisions, and mobilephones, LCDs (liquid crystal displays) are a pervasive and increasingly indispensable part of our lives. Providing both an historical and a business-minded context, this extensive resource describes the unique scientific and engineering techniques used to create these beautiful, clever, and eminently useful devices. In this book, the history of the science and technology behind the LCD is described in a prelude to the development of the device, presenting a rational development theme and pinpointing innovations. The book begins with Maxwell's theory of electromagnetism, and the ultimately profound realization that light is an electromagnetic wave and an electromagnetic wave is light. The power of mathematical physics thus was brought to bear upon the study of light, and particularly the polarization of light by material bodies, including liquid crystals. After a brief historical description of polarization, a physical interpretation provides substance to the mathematical concepts. Subsequent chapters cover: Thermodynamics for liquid crystals The Maier-Saupe mean field, phenomenological, static continuum, and dynamic continuum theories The transistor and integrated circuit Glass, panels, and modules The calculus of variations The active matrix Semiconductor fabrication The global LCD business Additionally, the book illustrates how mathematics, physics, and chemistry are put to practical use in the LCDs we use every day. By describing the science from an historical perspective and in practical terms in the context of a device very familiar to readers, the book presents an engaging and unique view of the technology for everyone from science students to engineers, product designers, and indeed anyone curious about LCDs. Series Editor: Anthony C. Lowe, The Lambert Consultancy, Braishfield, UK The Society for Information Display (SID) is an international society, which has the aim of encouraging the development of all aspects of the field of information display. Complementary to the aims of the society, the Wiley-SID series is intended to explain the latest developments in information display technology at a professional level. The broad scope of the series addresses

allfacets of information displays from technical aspects through systems and prototypes to standards and ergonomics. ANTICIPATE AND SHAPE TECHNOLOGICAL DISRUPTION...INSTEAD OF BEING VICTIMIZED BY IT Gain powerful insights for crafting strategy in technology-rich industries, from IT to finance, and healthcare to energy Understand the massive social impacts of technology, and how today's societal divisions shape your opportunities to innovate For everyone who must manage new technologies and respond to technological disruption From biotech to nanotech to big data, the pace of technological disruption continues to accelerate. Now, leading business strategy expert Alfred Marcus offers powerful tools for anticipating technological change, and managing the threats and opportunities it poses. Marcus illuminates the ongoing interplay between technological change and wider societal trends, helping you recognize new opportunities created by these interactions, and maximize the upside—both for your company and the broader society. Whether you're an executive or strategist, technical professional or MBA student, this guide will sharpen your focus on the future so you can navigate radical technological-driven change—wherever it leads. Emerging technologies offer immense promise for generating growth, profitability, and prosperity. But they face major obstacles to commercialization, and have environmental and social costs that must be carefully managed to maximize the benefit and mitigate the harm. This book is about the foresight and strategic actions required for these new technologies to play a positive rather than negative role. Alfred Marcus illuminates their potential, reviews the risky decisions needed to transform potential into reality, and discusses how technologies might be used to ameliorate social problems rather than exacerbate them. Whether you're an executive, manager, or student, you'll gain powerful insights into innovation, strategy, execution, technology management, and the fastchanging business environment in which technological change takes place.
