Long-Term Conditions Apr 16 2020 This book is a very welcome tool, which will enable health professionals to understand the complexity, challenge and rewards of proactively managing long-term conditions. Putting this knowledge into skilled practice, in partnership with patients, will transform the lives of many individuals and their families, and thus fulfil the fundamental purpose of nursing. —From the Foreword by Professor Rosemary Cook CBE, Director, the Queen’s Nursing Institute and Visiting Professor of Enterprise, University of Northumbria

Long-Term Conditions is a comprehensive, practical guide for nurses and healthcare professionals on the care and management of people with chronic illness. It explores case management, individual care and management, the role of the ‘expert patient’, quality-of-life issues, counselling skills, self-management, and optimum self-care. *Long-Term Conditions* discusses the three main long-term conditions currently resulting in most hospital admissions: diabetes, respiratory, and coronary heart disease, with a focus on empowering the patient to self-manage. Key Features: A comprehensive guide to the care and management of long-term conditions Focuses on the management of the

conditions from the patients' perspective Practical and accessible in style

The Future of Nursing Apr 28 2021 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Essentials of Psychiatric Mental Health Nursing - E-Book Oct 11 2019 Awarded third place in the 2017 AJN Book of the Year Awards in the Psychiatric and Mental Health

Nursing Category. Get a full understanding of today's psychiatric nursing practice in less time! Essentials of Psychiatric Mental Health Nursing, 3rd Edition offers the perfect balance of essential nursing interventions and clinical content paired with current research and evidence-based practice to fully equip you for today's field of mental health nursing. This new edition continues to retain the reader-friendly style, emphasis on therapeutic communication, and the nursing process organization that was successful in the previous edition. It also includes additional DSM-5 disorders, illustrations of various neurobiology disorders, a new neurobiology learning tool, and new NCLEX review questions to help you pass your course and thoroughly prepare for the psychiatric nursing section of the NCLEX. REVISED! Examining the Evidence boxes explain the reasoning behind nursing interventions and how research affects everyday practice. UNIQUE! Applying the Art sections in the clinical chapters provide examples of therapeutic and nontherapeutic communication techniques as well as realistic nurse-patient interaction scenarios. Chapter review questions reinforce essential content from the chapter. Critical thinking questions introduce clinical situations in psychiatric nursing. Nursing Interventions tables familiarize readers with interventions for a disorder that they will encounter in clinical practice. Key concepts and terms clarify essential terminology. Vignettes offer succinct, real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Assessment Guidelines familiarize readers with methods of assessing patients. Potential Nursing

Diagnosis tables give several possible nursing diagnoses for a particular disorder along with the associated signs and symptoms. DSM-5 diagnostic criteria identifies medical diagnostic criteria for psychiatric disorders for integration into the nursing plan of care. Important contributions from psychiatric mental health nursing pioneers are featured in the opening unit pages. Cultural Considerations sections reinforce the principles of culturally competent care. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list. Appendices feature the DSM-5 Classifications and a list of the latest NANDA-I diagnoses for readers' reference.

Adult Health Nursing - E-Book Feb 07 2022 Part of the popular LPN Threads series, this comprehensive text includes all of the vital medical-surgical and anatomy and physiology content you need to know. From an introduction to A&P to discussions of disorders by body system and beyond, Adult Health Nursing, 6th Edition, is an indispensable reference. Companion CD includes animations and audio clips depicting physiologic processes, physical assessment video clips, an English/Spanish glossary with definitions and audio pronunciations, an anatomy coloring book, and a fluid and electrolytes tutorial. Chapters begin with an overview of anatomy and physiology, providing a clear, basic understanding of A&P that LPN/LVNs need to know. The consistent, logical framework of the nursing process connects specific disorders to patient care. Safety Alert boxes help you implement The Joint Commission's safety guidelines in all settings, with considerations for special

populations. Nursing Diagnosis boxes, screened and highlighted in the text, include nursing diagnoses for specific disorders paired with the appropriate nursing interventions. Skills in a step-by-step format with full-color illustrations present clearly defined nursing actions with rationales for the skills and techniques you'll use in practice. Medication tables are meticulously detailed and provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Nursing Care Plans, presented in a case-study format, emphasize patient goals and outcomes and end with Critical Thinking Questions to develop your clinical decision-making skills. An emphasis on communication features real-life examples of nurse-patient dialogue and illustrates practical guidelines for effective communication. Patient Teaching boxes and Family Teaching boxes include post-hospital discharge guidelines and disease prevention instructions with a strong focus on three-way communication among the nurse, patient, and family members. Life Span Considerations for Older Adults boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Home Care Considerations boxes discuss the issues facing patients and caregivers in the home health care setting. Health Promotion boxes provide key information on staying healthy and preventing disease, with tips on wellness from Healthy People 2010. Cultural Considerations boxes discuss how to address the health needs of a culturally diverse patient population when planning care. Complementary and Alternative Therapy boxes includes

disorder-specific therapies, precautions, and possible side effects of non-traditional treatments. Enhanced focus on the NCLEX® Examination offers end-of-chapter Get Ready for the NCLEX Examination! sections with key points for self-guided study and remediation and an extensive set of review questions for thorough self-assessment. Additional review questions on Evolve provide instant feedback with correct answer and rationale for even more test-taking practice. Evidence-Based Practice boxes summarize the latest research findings and highlight how they apply to LPN/LVN practice. Updated, vibrant full-color design highlights key information and enhances your understanding of important concepts.

Nursing Care Plans Nov 23 2020 The bestselling nursing care planning book on the market, *Nursing Care Plans: Diagnoses, Interventions, and Outcomes*, 8th Edition covers the most common medical-surgical nursing diagnoses and clinical problems seen in adults. It includes 217 care plans, each reflecting the latest evidence and best practice guidelines. NEW to this edition are 13 new care plans and two new chapters including care plans that address health promotion and risk factor management along with basic nursing concepts that apply to multiple body systems. Written by expert nursing educators Meg Gulanick and Judith Myers, this reference functions as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as starting points in creating individualized care plans. 217 care plans --- more than in any other nursing care planning book. 70 nursing diagnosis care plans include the most common/important NANDA-I nursing diagnoses, providing the building blocks for you to create your own individualized care plans for your own patients. 147 disorders and health promotion care plans cover virtually every common medical-surgical condition, organized by body system. Prioritized care planning guidance organizes care plans from actual to risk diagnoses, from general to specific interventions, and from independent to collaborative interventions. Nursing diagnosis care plans format includes a definition and explanation of the diagnosis, related factors, defining characteristics, expected outcomes, related NOC

outcomes and NIC interventions, ongoing assessment, therapeutic interventions, and education/continuity of care. Disorders care plans format includes synonyms for the disorder (for easier cross referencing), an explanation of the diagnosis, common related factors, defining characteristics, expected outcomes, NOC outcomes and NIC interventions, ongoing assessment, and therapeutic interventions. Icons differentiate independent and collaborative nursing interventions. Student resources on the Evolve companion website include 36 of the book's care plans - 5 nursing diagnosis care plans and 31 disorders care plans. Three NEW nursing diagnosis care plans include Risk for Electrolyte Imbalance, Risk for Unstable Blood Glucose Level, and Risk for Bleeding. Six NEW health promotion/risk factor management care plans include Readiness for Engaging in a Regular Physical Activity Program, Readiness for Enhanced Nutrition, Readiness for Enhanced Sleep, Readiness for Smoking Cessation, Readiness for Managing Stress, and Readiness for Weight Management. Four NEW disorders care plans include Surgical Experience: Preoperative and Postoperative Care, Atrial Fibrillation, Bariatric Surgery, and Gastroenteritis. NEW Health Promotion and Risk Factor Management Care Plans chapter emphasizes the importance of preventive care and teaching for self-management. NEW Basic Nursing Concepts Care Plans chapter focuses on concepts that apply to disorders found in multiple body systems. UPDATED care plans ensure consistency with the latest U.S. National Patient Safety Goals and other evidence-based national treatment guidelines.

The latest NANDA-I taxonomy keeps you current with 2012-2014 NANDA-I nursing diagnoses, related factors, and defining characteristics. Enhanced rationales include explanations for nursing interventions to help you better understand what the nurse does and why.

Nursing Care in Pediatric Respiratory Disease Feb 24 2021 Pediatric respiratory disorders are responsible for a number of acute and chronic health conditions and are a leading cause of pediatric emergency room visits and hospitalizations. More than ever, nurses and nurse practitioners must have an understanding of the anatomy, pathophysiology, diagnosis and state of the art treatments in pediatric respiratory disease as they are often the first to come in contact with and recognize respiratory problems in children. *Nursing Care in Pediatric Respiratory Disease* seeks to provide both nurses and nurse practitioners with this information in order to aid them in the diagnosis and treatment of children suffering from acute and chronic respiratory disorders. *Nursing Care in Pediatric Respiratory Disease* opens with an overview of the anatomy and physiology of the respiratory system, best practices for assessing respiratory symptoms in children, and common respiratory therapies and treatment methods. It then proceeds through an examination of varying acute and chronic upper and lower respiratory diseases spanning from asthma and cystic fibrosis to vocal cord paralysis and sinusitis in both hospital and ambulatory settings. *Nursing Care in Pediatric Respiratory Disease* provides nurses and other health care providers with a comprehensive and practical resource which allows them to collaborate and advocate more effectively, as well as educate both the family and child in

management of respiratory disorders.

Nursing and Nursing Education Jan 26 2021 Results are presented of a study of nursing and nursing education that focused on the need for continued federal support of nursing education, ways to attract nurses to medically underserved areas, and approaches to encourage nurses to stay in the profession. Findings are presented on whether the aggregate supply of generalist nurses will be sufficient to meet future demand, and how changes that could occur in the health care system might affect demand. Attention is also directed to: how the current and future supply of nurses may be influenced by the costs of nursing education and the sources of education financing; and education for generalist positions in nursing. In addition, the supply and demand situation for nurses educationally prepared for advanced professional positions in nursing is examined. The influence of employer policies and practices in utilization of nursing resources on demand and supply is also addressed. Finally, areas in which further data and studies are needed to better monitor nursing supply and demand are identified. In addition to 21 recommendations, appendices include information on Nursing Training Act appropriations, state reports on nursing issues, certificates for specialist registered nurses, projections of registered nurse supply and requirements, and doctoral programs in nursing. Advanced Practice Nursing Ethics in Chronic Disease Self-Management Oct 23 2020 " This book fills a glaring void in the literature on patient self-management (PSM) by providing a clear ethical practice framework for PSM regimens based on current best practices. It addresses such questions as: What are appropriate standards of safety in PSM? How does one reach a good prognosis about whether or not patients will be able to practice PSM? The text discusses PSM of the major chronic diseases along with best practice intervention strategies. It maps out the implementation of the PSM framework for both patient and institution, supported by numerous case examples. Also covered are PSM challenges to Advanced Practice Nursing, three ethically valid assessment tools, and health policy concerns. The text is designed for course adoption and as a resource at MSN, DNP, and PhD levels. "

Cardiac Nursing E-Book Aug 13 2022 *Cardiac Nursing: A Companion to Braunwald's*

Heart Disease is the only comprehensive text available for cardiac nurses. This brand-new reference emphasizes both evidence-based practice and hands-on care in a high-tech, high-touch approach that meets the high-stakes needs of cardiac and critical care nurses. What's more, the book makes the material easily accessible by using clear language, straightforward text, and plenty of illustrations, lists, and tables. This book is the third in a series of companion texts for Braunwald's Heart Disease and the first specifically for nurses. Inflammatory Bowel Disease Nursing Manual Mar 08 2022 This comprehensive manual discusses the many aspects of inflammatory bowel disease (IBD), providing relevant information along with practical guidance. The reader is also directed to additional resources for extra and current information. This book comes at a time when the number of people suffering from the two major forms of IBD, ulcerative colitis (UC) and Crohn's disease (CD), is rising around the globe. Despite their huge impact on daily life and health economics, these diseases are not fully understood, and diagnosis and treatment remains a significant challenge. IBD nurses are increasingly recognised as key clinicians within the multidisciplinary team caring for people with IBD. Through experience and specialist knowledge IBD nurses provide timely support, advice, and treatment for people living with this unpredictable condition. IBD nurses are also well placed to liaise with the wider team, developing patient centred services which best fit their local health framework. The combined international expertise and accessible guidance here will equip nurses, or any

clinician wanting to increase their competence in IBD management. Thereby this manual aims to contribute to the optimisation of IBD care throughout the world.

Medical Surgical Nursing Care Sep 02 2021 The need for nurses is greater than ever before. There are no short-term solutions to this problem: as currently practicing nurses age and retire, so does the population as a whole, further increasing the need for health care services. Today, more than ever before, we need you, the nursing student, to succeed in your studies. Today, more than ever before, we need you, the nursing student, to enter the nursing profession. Today, more than ever before, we need you, the nursing student, to see nursing as a career, not just a job. This book is dedicated to your success as a student and as a practicing nurse. We believe a strong foundation in understanding the common diseases and disorders that affect adult clients is necessary to provide effective nursing care. We believe that understanding the basis for nursing care activities is vital to providing individualized care for clients. We believe that client teaching is a vital nursing role at all levels and in all settings. Medical-Surgical Nursing Care provides a strong foundation for caring through its emphasis on pathophysiology, nursing care, and client teaching.

Understanding comes not through memorization, but through practice and integration of new material into your thinking. Medical-Surgical Nursing Care promotes understanding in several ways. The writing style is clear, with a focus on readability. Its content is streamlined but thorough, focusing on what you need to know and to be able to do.

Organization Medical-Surgical Nursing Care is organized to promote learning. Part One, Medical-Surgical Nursing Practice, focuses on concepts, issues, and nursing care applicable to caring for adults in many different situations and settings. Parts Two through Seven focus on diseases and disorders affecting adults. These disorders are organized by functional health patterns (for example, nutritional-metabolic, activity-exercise) and by affected body systems under each functional health pattern (for example, common skin problems, bowel disorders, cardiac disorders). Each chapter begins with a Caring Tip that provides words of wisdom from the lived experience of a practicing nursing or nurse educator. You will be able to use these tips as you move into and through your career in nursing.

Learning Outcomes help focus and define your learning as you read and study the material. The structure and function of the affected body system is reviewed at the beginning of the chapter. Disorders affecting that body system are presented in a consistent format: the disorder is defined; its Pathophysiology, signs and symptoms, and complications are explained; and Collaborative Care (including diagnostic tests, pharmacology, surgery, and other treatments) for the disorder is outlined. Nursing Care related to the disorder is

presented in a nursing process format. When a disorder is major, very complex, or very common, all of the Nursing Process steps are provided. When it is not, the text provides an abbreviated, more focused discussion, similar to the focused assessment nurses perform. Because teaching is a vital nursing role, discussion of each disorder concludes with Discharge Considerations and teaching for the client and family. Case Studies following many major disorders bring the disorders to life. Clients rarely arrive in a health care setting as a pure medical diagnosis. As humans, clients bring all their roles and responsibilities as individuals, spouses, parents, children, workers, students, friends, and volunteers. They arrive as unique individuals influenced by their ethnicity, culture, and background. They arrive with psychosocial issues such as fear, guilt, or difficulty meeting financial responsibilities. They often arrive with other diseases and disorders complicating the current problem. The case studies in this text emphasize the holistic aspects of nursing care. Critical Thinking Questions conclude each case study. These questions allow you to practice your new found learning and to expand your thinking beyond the immediate focus of the disease or disorder presented. Additional Critical Thinking Self-Check Questions are provided on the CD-ROM throughout nursing care chapters. They provide more case scenarios for you to use to test your knowledge and thinking skills. These self-check questions focus on the nursing roles of collecting assessment data and implementing nursing care. Each case is matched with hints to guide your critical thinking. They will help you learn to individualize

your nursing care. Each chapter concludes with features to reinforce and enhance your learning. **Key Terms by Topic** list the boldfaced key terms in the text by the topic under which they were defined. **Key Points** provide a summary of chapter content with reminders that you can use throughout your nursing career. **For Further Study** is a handy listing of cross-references within the chapter and the topics to which they apply. An interactive **Critical Thinking CareMap** provides a brief case study, assessment data, and a nursing diagnosis for a specific client. We then ask you, the student, to sort the data and sample interventions, evaluate the results, and chart your findings. Finally, **NCLEX-PN Review Questions** and a **Test-Taking Tip** help you review the chapter material and practice your test-taking skills. **Features Throughout** each chapter, you will find consistent features to facilitate and reinforce your learning. To avoid interrupting your reading by reaching for your medical dictionary, **Key Terms** are presented in boldface type. They are defined in the text and the glossary at the end of the book. Other important or unfamiliar terms are italicized and defined in the text. **Clinical Alerts** within the text emphasize information critical to providing effective, safe clinical nursing care. **Cultural Care Strategies**, including nursing implications and self-reflection questions, prepare students to deliver culturally sensitive adult nursing care. **Color-coded boxes** organize highlighted information for quick retrieval: **red Data Collection boxes** for manifestations and risk factors of a disorder; **blue Nursing Care boxes** for nursing care related to specific tests or procedures; **orange boxes**

highlighting Client Teaching; and green boxes focusing on specific Population Groups and Nutrition information. Nursing Care Checklists quickly summarize nursing care activities for particular procedures or surgeries. Procedure Checklists review key steps in performing previously learned nursing care procedures and provide Sample Documentation. Pharmacology Tables highlight nursing implications and client teaching for drugs used to treat particular disorders.

Diseases and Disorders May 10 2022 Pocket handbook for students and nurses features tables and more than 270 diseases and disorders. Includes expanded information on gender and lifespan considerations.

EBOOK: Essential Pathophysiology for Nursing and Healthcare Students May 18 2020 Essential Pathophysiology for Nursing and Healthcare Students is the perfect quick reference and study guide for students covering pathophysiology, disease and therapeutics as part of a nursing or other healthcare course. It clearly and simply explains the underpinning processes of disease, covering cellular physiology, genetics, fluids, electrolytes and the immune system, and the main diseases and conditions that can occur within each. Each chapter is written in a quick reference format so it can be used for study, exam preparation or use on student placement. The book covers body systems including: Cardiovascular Respiratory Immune Lymphatic Nervous Digestive Endocrine Reproductive Developed with the reader in mind, each chapter includes clinical tips, case studies,

diagrams, and self-assessment questions to make pathophysiology accessible and digestible - this is a must-have book for students of nursing and healthcare. "Essential Pathophysiology for Nursing and Healthcare Students is a book that should be kept no further than an arm's reach away. The book is easy to navigate and easy to understand. Nursing and healthcare students will find that this book is essential in helping them comprehend and learn about the systems and mechanisms of the human body in health and ill health. This book would also be a good read for anybody working with or teaching students as a refresher on pathophysiology." Rebecca Bailey-McHale, Lecturer, Faculty of Health and Social Care, University of Chester, UK "This detailed but accessible book covers this subject in sufficient depth to give a good understanding of the topic without becoming overwhelming. As well as giving the evidence behind the text, this is a good resource if more in-depth reading is required. The authors have succeeded in writing a quick reference book that is remarkably in-depth and easy to read. This book would be suitable for any healthcare student who needs an understanding of the concept of pathophysiology however it would also be relevant for those seeking a general overview of the subject or more senior staff who wish to consolidate or refresh their knowledge." Rebecca Myatt, Guy's and St Thomas' NHS Foundation Trust, UK

Congenital Heart Disease Jul 12 2022 This book provides the theoretical and practical

basis of technical nursing in congenital heart disease; it is intended for nurses and nursing students, and for anyone involved in the treatment of these patients. The improvements in diagnosis and management of patients with congenital heart disease (CHD) are due to the recent advances in cardiac surgery and interventional cardiology and have meant that an increasing number of infants are reaching adolescence and adulthood. This manual is a practical and easy-to-use guide, which promotes effective cooperation between health professionals. Congenital heart disease is a disorder that is present at birth, and studies show that the incidence is around eight cases per thousand live births. The heart is formed during the first four - ten weeks of gestation, and alterations to this process can affect normal development, leading to heart defects. There are various types of heart defects: abnormalities that affect a single part of the heart (for example a valve) but also, highly complex abnormalities where there is severe damage to the cardiac architecture. The seriousness of the disease and the effects on child health vary: some forms have no real impact on child health and allow a normal life, while others are incompatible with life.

Haematology Nursing Nov 11 2019 *Haematology Nursing* is a comprehensive handbook, with a nursing focus, on the care and management of patients with haematological disorders. Divided into four sections, the first provides an introduction to haematology, looking at haemopoiesis, immunology and genetics. Section Two covers non-malignant haematology, including anaemia, haemoglobinopathies and haemochromatosis. Section

Three explores the pathophysiology, care and management of myeloproliferative and lymphoproliferative disorders, including leukaemia, myeloma, and lymphoma. The final section provides information on various nursing care interventions, including blood transfusion, venous access devices, and palliative care. Aimed principally at nurses working in a variety of settings including haematology/oncology wards, medical/haematology wards, specialist bone marrow transplant centres, and community settings, Haematology Nursing is an essential and much-needed reference guide.

Ulrich & Canale's Nursing Care Planning Guides Sep 21 2020 Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and

rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Men's Health and Cardiovascular Disease: the Nursing Care Management in Ambulatory
Apr 09 2022 Abstract: Objectives: characterize the socio-demographic conditions and life habits of male customers and discuss about managing cardiovascular nursing care in

outpatient level. Method: transversal study and descriptive, exploratory with 50 participants. Applied an interview on personal data, life habits and health conditions. We used Epi Info™ version 3.5.2 for statistical analysis. Approved research on the Ethics Committee and research opinion no 236,786. Results: were characterized men over 40 years, retirees, pensioners or the unemployed, with low income and education, poor sleep pattern and 52% with hypertension. It was observed that the risk factors are modifiable, and fix them through health education and lifestyle changes. Conclusion: There are big challenges for the management of nursing care in a gender perspective offering important discussions on promotion and prevention of diseases
